

REMARKS

Applicant has amended claims 1 and 32 to include the limitation that the electronic device having a device connector (150) (see Figure 8b) and the circuit connector can be attached to the device connector either in a first attaching position (see Figure 8c) or in a second attaching position (see Figure 8d). Applicant has also amended claim 26 to include the limitation that the circuit is removably attached to the device connector so that the circuit connector can be attached to the device connector for conveying the signals from the circuit to the device body. Applicant has also added a new claim 38, claiming that the circuit connector can be detached from the device connector so as to allow the user to change the attaching position. The support for the amendment can be found in Figures 8b - 8c. No new matter has been introduced.

Respectfully submitted,

Kenneth Q. Lao
Attorney for the Applicant
